Knowledge Platform

# About the conference

The GGKP's Third Annual Conference on "Fiscal Policies and the Green Economy Transition: Generating Knowledge - Creating Impact" is hosted in partnership with the University of Venice, The Energy and Resources Institute (TERI) and the United Nations Environment Programme (UNEP).

The conference will draw together researchers, experts and policy makers to jointly assess the efficacy, geographical applicability and policy implications of various fiscal instruments in the transition to a green economy.

The GGKP is global partnership of leading organisations that identifies and addresses major knowledge gaps in green growth theory and practice. Established by the Global Green Growth Institute (GGGI), the Organisation for Economic Co-operation and Development (OECD), UNEP and the World Bank, the GGKP has since expanded to include over 35 partner organisations.
